

# SILVUS CONNECT

QUARTERLY NEWSLETTER

Keeping you connected to the latest Silvus news, events, collaborations and product innovations.

## New Product Launches

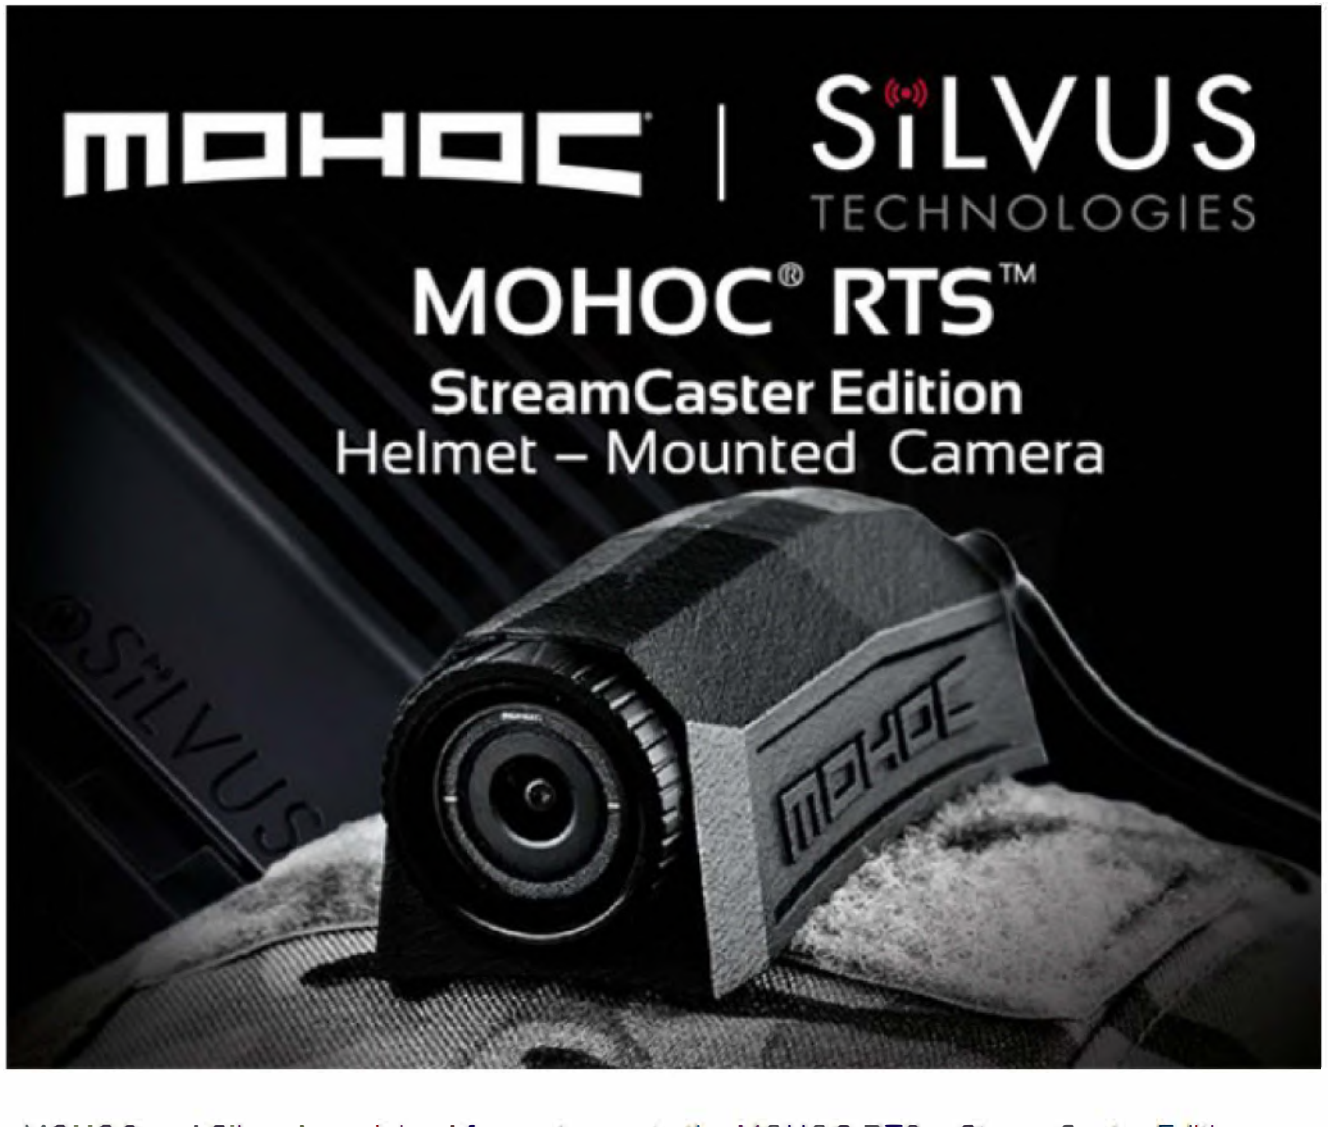

Silvus Technologies and Kägwerks have joined forces to introduce DOCK StreamCaster, the next generation of Tactical Networking Systems and latest addition to the Kägwerks DOCK (Dismounted Operators Combat Kit) ecosystem.

Designed for the Universally Connected Warfighter, DOCK StreamCaster combines advanced StreamCaster MANET radios with Samsung's mission-ready EUDs in one fully-integrated, ruggedized chest-mountable kit. Compact and lightweight, each DOCK StreamCaster features a rugged, low SWaP profile and modular design, with streamlined cabling and unified power that reduces operator load-out while increasing mobility and mission effectiveness.

With built-in ATAK, Intra-Soldier Wireless and Nett Warrior connectivity, DOCK StreamCaster empowers operators with enhanced situational awareness and decision superiority at the tactical edge.

Contact your Silvus Sales Representative for pricing and availability.

[LEARN MORE](#)

MOHOC and Silvus have joined forces to create the MOHOC RTS – StreamCaster Edition, designed to be plug-and-play compatible with StreamCaster 4000-series MANET radios.

Built for the hyper-enabled operator, the MOHOC RTS – StreamCaster Edition delivers real-time video streaming through StreamCaster MANET radios, maximizing situational awareness at the tactical edge. Compact, lightweight and simple to operate, its patented helmet-contoured base and ruggedized low-profile housing eliminates snag hazards for increased mobility.

The MOHOC RTS – StreamCaster Edition's design allows for mounting on multiple helmet or tactical vest locations – with the flexibility to be used as a remote ISR sensor for integration into vehicles, robotics and other operational environments. Through an intuitive web-interface, users can customize image quality, camera settings and video capture parameters. On-board sensors provide 20x improved low-light sensitivity than previous generation MOHOC models, with customizable video output streams (2x H.264; 1x MJPEG).

Contact your Silvus Sales Representative for pricing and availability.

## Featured Partner - FLYMOTION

“The Silvus Tactical Bubble powered by StreamCaster MANET radios and the flexible, wide area coverage of the StreamCaster PRISM antenna array, played a crucial role in connecting multiple unmanned ground and air systems during last year's UTAC2023 training event. This allowed our technology partners to concentrate on the demo and not connectivity, and participants to train like they operate, without interruptions through real life tactical based scenarios. We'd also like to thank the Silvus team behind the tech for their responsiveness and collaboration and we look forward to working with them on future end user training events and integrations.”

Maurice Cooley  
Director, Technical Operations,  
FLYMOTION

As a trusted industry partner, Silvus StreamCaster MANET radios integrate with FLYMOTION's end-to-end tactical technology solutions to provide critical C2 & comms links that unify both manned and unmanned operational assets in any environment.

## News & Notables

### Silvus Assists Inter-Agency Raid in Puerto Rico

Silvus was proud to provide a Federal inter-agency task force with technical support and StreamCaster MANET radios. Together we created a Tactical Bubble that provided real-time situational awareness - delivering high-fidelity voice and video mesh network communications for successful execution of an intricate drug trafficking raid in Puerto Rico.

### Armada Podcast

The modern electromagnetic battlespace is becoming more distributed, more mobile and more lethal. Silvus' Jimi Henderson joins host Thomas Withington on the Armada International MilCom Podcast to examine the challenges of establishing resilient and robust mesh communication networks, and the innovative solutions that empower the warfighter to achieve Spectrum Dominance at the tactical edge.

## Out & About

### Silvus ConnectU+ INDOPACOM

ConnectU+ INDOPACOM 24 is a wrap. Hosted by Silvus Technologies, this two-day learning and experimentation event enabled U.S. DoD service members and representatives from Allied Partner Nations to go hands-on with StreamCaster MANET radios and leading-edge tactical technologies. Check out the highlights video below. Big thanks to our industry Technology Partners: Quantum Systems, Echodyne, Protocable, FalCom, Far Field Exploits Ltd, and KÄGWERKS for their support.

### Silvus @ SOF Week 2024

It was great connecting with the SOF community and partnering with KÄGWERKS to unveil the DOCK StreamCaster – the next generation in tactical networking systems. Combining advanced StreamCaster MANET radios and Samsung S23TE EUDs in one fully integrated chest-mountable DOCK system - we demoed how it's empowering the Special Operations warfighter with enhanced situational awareness and advanced tactical networking capabilities. Check out the Silvus @ SOF Week wrap up video for more insights, or learn more about DOCK StreamCaster.

## Team Building

**Tom Bleier**

Join us in welcoming [Tom Bleier](#) to the Silvus Team as Director of Sales, Unmanned Aerial Systems! With over 20 years of sales, business development, and strategic leadership experience, Tom brings to Silvus an extensive track record across cutting-edge technology companies including Sentient Vision Systems, SkylMD, and Rocket Science Networks, among others. In his new role, Tom will develop and drive Silvus' sales growth throughout the unmanned systems market.

[LEARN MORE](#)

**Mostafa "Moose" Ibrahim**

Join us in welcoming [Mostafa Ibrahim](#) to the Silvus team as our new Senior Product Manager! With seven years of experience in engineering and project management experience, and a passion for innovation, Mostafa brings a fresh perspective and dynamic energy to the Silvus team. In his new role he will lead and manage Silvus' end-to-end product development process to deliver on the company's aggressive product roadmap.

[LEARN MORE](#)

**Michael Lee**

We are thrilled to announce that [Michael Lee](#) has officially joined the Silvus team after an impressive internship! From the moment he started, Michael demonstrated his skillset and expertise as a software engineer while showcasing qualities that we value most in an intern: ambition, diligence, dependability, initiative, and collaboration.

[LEARN MORE](#)

**Thomas Stringer**

Please join us in welcoming [Thomas Stringer](#) to the Silvus team as an International Sales Engineer!

We look forward to the contributions he'll make to our international technical sales team, supporting Silvus' customers, partners and company growth around the globe.

## Nick Kauffroath - Celebrating 10 Years of Service

Working for Silvus as a Sales Engineer the past 10 years has been an amazing experience, and as I look back, I think I work for the coolest company in the world. Silvus has always been about solving issues by making the best radio we can and working as a team to do so. The years might move on, and the company has gotten bigger, but we've held onto those principles, and we don't let pride get in the way of getting better. One of the greater parts of my job is that I've travelled just about everywhere in the world helping our customers. I wouldn't trade those experiences for anything, and the problems we have helped solve with our radios fill me with pride. After all this time, working for Silvus is still exciting because our technology consistently pushes the envelope of what is possible, and I look forward to seeing what the next 10 years brings!

**Nick Kauffroath**  
Principal Sales Engineer

**SILVUS**  
TECHNOLOGIES

Join us in celebrating Silvus' Principal Sales Engineer, [Nicholas Kauffroath](#), on his 10th work anniversary. As a key member of the Silvus Sales Engineering team, Nick travels the world - leveraging his years of hands-on experience and knowledge base to empower customers to get the most out of their StreamCaster MANET radio equipment.

Here's to ten more years of solving the toughest communications problems

## StreamCaster Training Program

Go beyond conventional product training to walk away with the technical know-how to stand up and optimize a Silvus mesh network anytime/anywhere.

**Upcoming Course Schedule @ Silvus HQ, Los Angeles, CA:**

- July 29 – August 1
- **NEW DATES: August 26 - 29**
- September 23 – 26
- November 18 – 19

### Training at Your Location

Silvus Instructors bring the StreamCaster Training Program to you onsite, to train your team on the go.
